ARE YOU READY TO KB?

THE PRES RELEASE

November 5 & 19. D Day 1977. Zero hour 2100Z. It's now 2030Z, thirty minutes to go. I flick on the rotor switch and listen for the faint whine as the indicator needle swings to 270 degrees. The mass of steel and aluminum settles on target, ready to unleash it's deadly signal upon the land. There's gonna be a big dark spot on the map where California used to be. The moment of truth is close at hand. I won't quit until the last Q is made or 0300Z rolls around Sunday night. My goal is clear. To help make YCCC #1 in SS 1977.

Good luck and KICK BUTT in SS!!!

73, K1ZM
